To Whom It May Concern;

I have had the pleasure of working with Paul McCaig, Steve Bessey and the staff of Paulsan Construction for several years and over the course of numerous projects. It is from these experiences that I am able to highly recommend them for any construction project that becomes available.

Paulsan Construction completed all projects in a timely manner, with professionalism and with a sincere conviction to working around delicate conditions, such as patient privacy at a Medical Centre or working in a group home setting.

These projects involved a variety of construction renovations which included planning, design, demolition and ultimately, construction. As well, these projects specifically addressed construction such as bathroom renovations at a group home for disabled individuals, group home fire prevention sprinkler system, reception counter in administration building and a basement apartment renovation for a supported individual.

At Brantwood, we continue to look to Paulsan for our construction solutions and I highly recommend Paulsan for any project opportunity.

Please feel free to contact me if you have any questions or require any further explanations.

Respectfully,

Stephen (Steve) Wood, BA, FCPA, FCMA
Director of Finance
Extension 116
