To Whom it may Concern;

I have had the pleasure of working with Paul McCaig and the team at Paulsan Construction for over 10 years. During this time, we have worked on projects both large and small, commercial in nature and residential as well. It is from these experiences that I am able to confidently recommend Paulsan for any construction project that becomes available.

Paulsan construction completed all projects in a timely manner, on budget, with professionalism and with a sincere conviction to working around delicate conditions. Conditions such as patient privacy at a Medical Office, noise consideration in a group home setting or working in a busy Community Centre.

These projects involved a variety of construction renovations which included planning, design, demolition and ultimately, construction. As well, these projects specifically addressed construction such as bathroom renovations at a group home for disabled individuals, a fire prevention sprinkler system, a large Boardroom / Training room upgrade and a large medical office which included a reception area, examination rooms and a number of private offices for a group of physicians.

At Brantwood, we continue to look to Paulsan for our construction solutions and I highly recommend Paulsan for any project you may have.

Please feel free to contact me if you have any questions or require any further explanations.

Respectfully,
